From concept to final product, we ensure innovative, sustainable solutions that comply with industry regulations.

Aluminium Solutions for Temporary Buildings

With our extensive in-house capabilities, we offer a full range of low-carbon aluminium profiles and components designed to meet the extensive requirements of Temporary Buildings.

Proudly Made in the UK

All of our aluminium products are made, extruded, and fabricated entirely in the UK, showcasing our dedication to British manufacturing. As a "Made in the UK" accredited company, we prioritise local production and sustainable practices. This not only supports the local economy but also allows us to maintain stringent quality control and offer shorter lead times for our customers.

Greener Offerings

Sustainability is central to everything we do. We have laid out a clear and ambitious roadmap to achieve net-zero emissions before 2050. Our near-term goal is a 30% reduction in carbon emissions by 2030, driven by greener power sourcing. By focusing on reducing emissions throughout our production process, we are creating aluminium solutions that not only perform at the highest level but also contribute to a lower carbon footprint for our customers.

Recycling for a Circular Economy

Aluminium is a cornerstone of the circular economy. Its infinite recyclability makes it the ideal material for sustainable manufacturing, and we are dedicated to using recycled post-consumer aluminium scrap as a key pathway to zero-carbon production by 2030. By promoting transparent recycling standards, we aim to help industries reduce their carbon footprint while benefiting from the strength, lightweight properties, and durability that aluminium provides.

Complete Aluminium Solutions

We offer a one-stop shop for aluminium profiles, providing services from design consultation to prototyping and final fabrication. Our expert engineers work closely with you to deliver custom solutions that meet regulatory standards, improve performance, and enhance sustainability. With UK-based production, we ensure high-quality, tailored products to fit your exact needs.
