Extrusion North America (ENA)
Specification Reference Roadmaps

The following roadmaps are intended to illustrate the connection between product specifications (in blue), testing specifications (in orange), and process specifications (in green) that may apply to the manufacturing of aluminum extrusions.

Notice & Disclaimer: These roadmaps are not intended to be all-inclusive lists of product specifications or the testing and process specifications referenced therein. These are provided for informational purposes only. ENA’s interpretation of these specifications may not be appropriate for use by others and is subject to change without notice. ENA accepts no responsibility for the accuracy or completeness of this information and recommends consultation with competent professionals regarding the specifications referenced herein. For more information on the optimal ENA location to meet relevant extrusion requirements, please refer to the chart located at https://www.hydroextrusions.com/technicalspecifications.
Guidelines for a self-assessment typically required by automotive OEMs for direct, Tier 1, and Tier 2 supplier heat treatment processes.
